## AUSTRALIA'S OWN MUSHROOM CASING PEAT

***Ideal Component for all Mushroom Casing Types***  
***Free of Weeds, Weed - Moulds and Nematodes***  
***High Available Water Holding Capacity***  
***Less Lime Required to Lift pH***  
***High Humus Content***

- Less shrinkage compared to Sphagnum or imported darker peats
- Screened, uniform particle size and structure to maximise water holding
- Readily absorbs water but releases more slowly than Sphagnum or imported darker peats

### HOW TO USE

**Application** Mushroom Casing  
**How much to use** 25% - 75% of total casing mix  
**How to apply** Dry or wet, mix thoroughly. Wet up to normal consistency

### ANALYTICAL DATA

pH	5-6.5
Moisture Content	45%-55%
Ash Content	< 35%
Weeds	Free
Nematodes	(Trichoderma, Verticillium, Dactylium, Mycogone, & Plaster Moulds) Free

Available in bulk, bulk bags and 20L bags. Other sizes available on request.

### INCREASING MUSHROOM YIELD

Grower experience and academic research has demonstrated the importance of casing water tension on mushroom yield. The research has shown that higher mushroom yields can be obtained from regular monitoring and management of the watering regime.

The most important factor-influencing yield is the tension at which the water is held in the casing. If the casing is too wet, that is the tension too low, the air spaces become restricted, and will account for reduced mushroom growth and yield. If the casing is too dry and thus the tension too high, water availability is restricted and yield reduced. Biogreen's reed-sedge peat buffers the variability of water holding as it holds the water in the peat for longer than Sphagnum or imported darker peat blends.

**General Information:** The *How To Use - General Guide* offers general advice on mix & application rates. Trials are recommended to optimise specific use.

#### LIABILITY LIMITATION

**Limited Warranty:** Biogreen warrants that the composition of the product conforms as closely as possible to the description on the label as determined by a laboratory testing programme. Biogreen has acted in its best endeavour to represent the product truthfully but notes that organic natural products can vary.

**Disclaimer of Warranties:** Biogreen sells its product as is where is and specifically excludes any and all warranties, whether written or oral, or implied, including any warranty of performance or fitness for a particular purpose or use.
