**Application:** Potting indoor and outdoor containers

**Pack Size:** 25 litres    **Pallet Qty:** 72

**Standard:** Australian Regular Standard AS3743

### Moisture+ Regular Potting Mix

Biogreen's Regular Potting Mix is an advanced and versatile formula that has been designed for use in outdoors and indoor container gardening in pots. The product has been formulated and guaranteed to grow greener, healthier and more vigorous plants, flowers, trees and shrubs, with better colour and heavier, sweeter fruit. A balanced fertiliser has been added and will last for one month from planting. Biogreen Regular Potting Mix contains a rich blend of Australian Black Peat and composted barks, organic materials, Biogreen soil conditioner, moisture retention wetting agent and a balanced fertiliser. Guaranteed to grow quality plants, in containers and garden beds.

### Biogreen Peat lasts longer to Grow Better

- + CONSERVES WATER
- + PROMOTES ROOT GROWTH & SOIL STRUCTURE
- + A BALANCED FERTILISER HAS BEEN USED IN THIS FORMULA AND WILL LAST FOR ONE MONTH.
- + WATER RETENTION LIQUID
- + FINEST QUALITY BLACK PEAT AND COMPOSTED BARKS

**'Grow your Profit'**

# How to use Biogreen Regular Potting Mix

## POTTING & PLANTING

- + Choose a new pot slightly larger than original, with drainage hole.
- + Fill your pot gently with several inches of Biogreen Regular Potting Mix
- + Pat down.
- + Centre root ball in pot and fill with potting mix.
- + Leave about two inches between potting mix level and rim.
- + Pat down gently but firmly and water thoroughly.

Fertiliser will be needed one month from planting; additional fertilizer may be required, depending on plant needs.

## Gardening Know How

**How do you know if your plants need Repotting?**

**These are the signs to look for:**

- + **Roots growing from drainage holes**
- + **Wilting or yellowing leaves**
- + **Little or no new growth**

**What sort of light is required for indoor plant success?**

- + **Locate Indoor plants in a location with bright, indirect sunlight.**

**How often should you water?**

- + **Too much or too little watering often causes plant failure.**
- + **For best results, water houseplants only when the soil is slightly dry to the touch.**

## Biogreen Moisture+ Potting Up Guide

Metric	Imperial	Approx No. of pots from 1 X Bag
100mm	4 inches	50
150mm	6 inches	30
200mm	8 inches	6
250mm	10 inches	4
300mm	12 inches	2
350mm	14 inches	1.5
